

SLOW START FOR SYSTEM

Months Needed to Get Postal
Savings Banks
INTO PROPER OPERATION

Little Interest in Postal Savings Bank
Shown in South Atlantic States.
More Inquiries Coming from
the North.

Washington, July 18.—Several months will be required to make preparations for establishing postal savings banks, according to the opinion expressed by Postmaster General Hitchcock before leaving the United States recently for a brief vacation abroad.

The desire of President Taft to have the system operated in part as soon as possible by the establishment of from ten to twenty experimental postal banks probably will hasten the work of opening them for business.

The trustees of the postal savings bank system will hold a meeting shortly after Mr. Hitchcock returns to this city, when it is expected that Secretary MacVane of the treasury department and Attorney General Wickersham, the other trustees, will be here. The committee of government officials, which is now working to perfect a plan of organization, has received no replies as yet from foreign governments to the request for various blanks and regulations pertaining to their postal savings bank system. Before the committee concludes its plans, it wishes to profit by the experience of other governments.

Interest throughout the country concerning the establishment of postal savings banks is shown by the application of about 400 banks, in 41 states, to be depositories for postal funds. Although postmasters will not receive extra compensation for work done in connection with the receiving of deposits, about 175 have made application to have their offices designated as postal banks. These postmasters are located in 30 states, the majority, however, being in Ohio, Michigan, Minnesota, Wisconsin, Illinois, Texas and Oklahoma.

The south Atlantic states are conspicuous because of an apparent lack of interest on the part of the postmasters in applying for the establishment of postal banks. The applications of postmasters will not influence the establishment of postal savings banks, although their attitude toward them is looked upon as indicative of the sentiment in their several communities.

PATTEN CLEARS UP \$3,000,000.

That's What Wall Street Says, But Probably It Isn't So.

New York, July 18.—There was a rumor in Wall street recently that James A. Patten had cleared something like \$3,000,000 recently on spring wheat. He had been foreclosed, the report ran, with the result that he had been able to dispose of his holdings with this large profit.

It was only a short time ago that the news was circulated about Mr. Patten's withdrawal into retirement. For this reason, not much credence was placed in the report of his timely dealing in spring wheat.

Broke a 30-Year Record.

New York, July 18.—Melvin W. Sheppard, the crack middle distance runner of the Irish American A. C., broke a world's record which had stood for 30 years when he ran 1000 yards at Celtic park yesterday in 2:12 2-5, clipping 3-5 of a second from the mark established many years ago by Lon Myers. Sheppard took the lead from a field of 13 after a hundred yards and won by five yards.

The Cause of Many Sudden Deaths.

There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by it—heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, brick-dust or sediment in the urine, head ache, back ache, lame back, dizziness, sleeplessness, nervousness, or the kidneys themselves break down and waste away cell by cell.

Bladder troubles almost always result from a derangement of the kidneys, and a bottle and a book that tells all about it, both sent free by mail. Address, Dr. Kilmer & Co., Binghamton, N. Y. When writing mention reading this generous offer in this paper. Don't make any mistake, but remember the name, Swamp-Root, and don't let a dealer sell you something in place of Swamp-Root. If you do you will be disappointed.

Blood Humors

Commonly cause pimples, boils, hives, eczema or salt rheum, or some other form of eruption; but sometimes they exist in the system, indicated by feelings of weakness, languor, loss of appetite, or general debility, without causing any breaking out.

They are expelled and the whole system is renovated, strengthened and toned by

NORTHERN LEAGUE

TO BE REVIVED

Meeting was Held in Rutland Last Night and Schedule Will Be Arranged On Saturday.

Rutland, July 18.—The Northern league is to be revived, this being decided at a meeting held in this city last night, at which Burlington, Montpelier, Barre and Rutland in this state and Whitehall, N. Y., were represented. Although officers were not elected at last night's meeting, they will be at a meeting to be held here Saturday night and P. F. McManus of Rutland is slated for the presidency. The meeting was adjourned at the request of Glenn Falls, N. Y., and Proctor, as these places are planning to put teams into the league. The schedule will be arranged Saturday night and the league season will open the first part of next week. Montpelier and Barre will support a team jointly.

Yesterday's American League Results.

At New York, St. Louis 4, New York 3.
At Philadelphia, Philadelphia 5, Chicago 2.
At Boston, Boston 9, Detroit 4.

American League Standing.

CHALLENGES HEAVYWEIGHTS.

Hugh McIntosh Puts Up \$5,000 In Behalf of Unknown Pugilist.

New York, July 18.—Hugh McIntosh, promoter of the Johnson-Burns fight, yesterday issued a challenge to the heavyweights of the world on behalf of an unknown pugilist. McIntosh says the unknown will be named by Corbett, who will train the fighter. McIntosh states he will post \$5,000 as a forfeit and hopes that Jack Johnson will accept the challenge.

RACE FOR HARMS' WORTH CUP.

British Motorboat Owner Will Send Entries For International Contests. According to Commodore H. H. Melville of the Motorboat Club of America, who returned recently from England, where he has been making the final arrangements for the coming international motorboat race for the Harmsworth cup, the keenest interest is displayed by the British motorboat owners in the coming race, and many of them are coming over to attend it.

It is almost definitely settled that one of the English motorboats participating in the race will be the Maple Leaf, owned by Mackay Edgar of the British Motorboat club. The remaining two of the three contestants allowed to England will very likely carry the flag of the Motor Yacht Club of Great Britain, and there is a strong possibility that one of these will be a hydroplane.

Dr. Martin Smart of the British Motorboat club, who offered a cup as a prize in the English elimination races, anticipates being among the visiting motorboat enthusiasts to the international race at Larchmont on Aug. 20. Commodore Cummins of the Motor Yacht Club of Great Britain also expects to come over for the race with a party of ten or twelve followers of motorboat racing, among them being several titled English sportsmen.

There will be no postponement of the race on account of bad weather.

The Restless, owned by the Chesborough brothers of the Motorboat Club of America and expected to prove one of the three American contenders, has developed wonderful speed at its trials, making thirty-eight miles. It is claimed by its builders that it will reach forty-five miles.

BASEBALL CHIRPS

George Lachance, the old Boston first baseman, has been appointed an umpire in the Connecticut State league.

Griffith, McGraw and Bresnahan are the hit and run managers, while Chance, Clarke and Lake are depending more on the sacrifice hit. Dooten and Dahlen are mixers.

Any ball club that is fast on the bases will win unless their opponents do some fine pitching and fielding. A loosely played game always gives a speedy team an advantage.

Bob Emmett has been umpiring steadily for twenty-five years. It was Charlie White of Spaulding's, then president of the Eastern league, who gave him his first job as umpire.

BEVERLY TO BAR HARBOR

The Mayflower Takes President Taft and Party

DOWN THE MAINE COAST

Will Speak Three Times—But He Says That He Will Not Touch Upon Any Political Subject.

Beverly, Mass., July 18.—President Taft arranged to leave Beverly late yesterday afternoon for a 10 days' cruise in Maine water. The presidential yacht, Mayflower, all white and spruced up for the trip, dropped down to Beverly, from Gloucester Sunday afternoon. Mr. Taft and the members of his family have been looking forward to the cruise with a great deal of pleasure. There will be no controversy, but the Mayflower will keep close to the shore and will be in wireless touch with navy stations along the coast the entire time the president is aboard.

The trip to Maine was planned at first wholly as a vacation outing. At the last moment the president consented to make three speeches at different points in Maine. The addresses will be entirely informal, however, and Mr. Taft will not touch upon politics in any way. The first visit ashore and the first speech will be at Eastport, where the Mayflower was due to arrive this noon. The second speech will be at Bangor on Saturday, the 23rd, and the third will be at Rockland on Tuesday, the 26th. Mr. Taft will spend three days at Bar Harbor, where he will golf each afternoon. The Mayflower's itinerary in a general way is as follows:

Monday, July 18, leave Beverly; Tuesday, July 19, at Eastport; Wednesday, Thursday and Friday, July 20, 21 and 22, at Bar Harbor; Saturday, July 23, at Bangor during the afternoon, spend the night at the home of Senator Hale at Ellsworth.

Sunday and Monday, July 24 and 25, cruising near Bar Harbor and Islesboro, with a stop at the latter place.

Tuesday, July 26, at Rockland; Wednesday, July 27, at Biddeford Pool; Thursday, July 28, arrive at Beverly. The personnel of the party on the Mayflower is as follows: The president, Mrs. Taft, Master Charles Taft, Horace D. Taft, brother of the president, Prof. and Mrs. Louis T. Mire of Cincinnati, Secretary Norton, Assistant Secretary of the Navy and Mrs. Beekman Winthrop, Miss Mabel Boardman, Captain Archibald W. Butt.

WARRANT FOR MURDER.

Served on Boy for Alleged Participation in Newark Lynching.

Zanesville, O., July 18.—Charged in a warrant for first degree murder for fastening the rope around the neck of Carl Elberington, the "dry" detective, lynched at Newark ten days ago, William Wurster, Jr., aged 19, employed in a Zanesville store, was arrested last night and held without bail for Newark officers. To reporters the boy said he was in the mob adding that he had "been drinking."

Accident on Trolley.

Cambridge, Mass., July 18.—Eight young women were injured yesterday, when an electric car jumped the rails on Huron avenue, throwing many of its occupants out upon the sidewalk. Four of the young women were taken to the hospital.

Mrs. Stetson's Friends Feel the Atonement. Boston, July 18.—Sixteen of the practitioners, who supported Mrs. Augusta Stetson in her controversy with the First Christian Science church in New York City, have been dropped from membership by the board of directors of the mother church in Boston, according to a statement made by Archibald Melchior, one of the Boston directors.

LONG TRIP IN LAUNCH.

Chicago Woman and Son Travel 6,312 Miles in Great Cruise.

A remarkable river, ocean, canal and lake motorboat journey was concluded recently when the Catherine M., a thirty-five foot cruising launch, carrying Ralph M. Pearson and his mother, Mrs. Kate Pearson, came into dock in Chicago river.

May 3, 1909, the boat started from the spot at which the docked and completed the cruise down the Mississippi to the Atlantic coast, up the Gulf coast, north along the Atlantic coast, up the Hudson, through the Erie canal, across Lakes Erie and Huron, through the strait of Mackinac and up Lake Michigan to the river—6,312 miles.

Will Row For the Championship.

Ernest Barry, the English champion, has left England for South Africa, whence he will travel to the Zambesi, where on Aug. 18 he will row against the world's sculling champion, Barry was in splendid shape when he left England and very confident of making a good race for the title. He is a fine oarsman and has created new records on the Thames during his training for the forthcoming trial.

A Gun Club's Treasure.

Thirteen million cartridge shells, the result of eleven years of shooting by the members of a gun club, have been gathered into a huge pile by one of the leading sporting organizations of England. Eleven years ago one of the members conceived the idea of having the members save all their shells and deposit them on the pile. The shell bank is now the club's most prized possession. If a single man were to shoot one cartridge a second day and night it would take him about twenty-five years to discharge 13,000,000. The club maintains a vigilant guard over its precious shell pile.

GALLANT TRAMP DEFENDS GIRL

He Knocked Out Two Insolent Men,
and Now Wears a New Suit and
Lives in Luxury.

Trenton, N. J., July 18.—Although he is a self-confessed hobo and is proud that he is a knight of the road, Harry Williamson Gunter is being made a hero of by Trentonians.

He dropped off a freight train here with the hope that he could strike something to eat, and tried several back doors, but in all cases was either refused or chased from the premises by dogs.

While walking through South Trenton he heard two young men utter a vulgar remark as a young woman passed them. She stopped and demanded an explanation. The youths only used more obscene language. Gunter saw the incident and heard the remarks. Without hesitation he began to do things, and in a few seconds both insulters were on the ground. The victims of the assault cried, "murder, police," and later had the tramp arrested for assault and battery.

When he was arraigned in court and ready to receive sentence, he having pleaded guilty, Miss Matilda Cooper, the young woman to whom the vulgar remarks had been addressed, interceded in his behalf and told the circumstances leading up to the assault. Gunter was immediately released, and his victims were both heavily fined for using profane language and disorderly conduct.

Gunter is now wearing a new suit of clothes and is a visitor at the Cooper home, although he tried to escape on a freight immediately after his release.

BALLINGER VINDICATED.

Majority of Committee Says His Policy Justified.

Chicago, Ill., July 18.—According to the Chicago Tribune Secretary Richard A. Ballinger will be exonerated by the majority report of the joint congressional committee, which for five months has been making an exhaustive investigation of the affairs of the department of the interior and of the bureau of forestry of the department of agriculture.

The five investigators, who concur in the majority report, which carries condemnation of the course of former Chief Forester Pinchot, J. R. Garfield and Louis R. Glavis are Senators Nelson, Flint, Sutherland and Root and Representative McCall, Denby and Olmstead.

It also declared that a minority report will be filed, declaring Secretary Ballinger guilty of the charges made against him, to which the signatures of Senators Funnell and Fletcher and Representatives Madison, James and Graham will be attached.

The majority report is said to find that Secretary Ballinger acted within the record and displayed proper judgment with respect to the Cunningham coal claims and that he was justified in his criticism of the reclamation service and in his abandonment of the policy of Secretary James R. Garfield.

CRAWLS ALMOST MILE TO DEPOT

64-Year-Old Man Hit by Automobile Which Did Not Stop After Accident.

Lowell, Mass., July 18.—Struck by a speeding automobile, which passed on without stopping, as he was walking to his home late Sunday night, John Riley, 64 years old, of North Billerica, crawled three-quarters of a mile to the North Billerica depot on his hands and knees and then collapsed. He was not found until 11 o'clock yesterday morning.

Riley is now in the St. John's hospital, suffering from a wound of the scalp and possibly concussion of the brain and internal injuries. The police are looking for the automobile that struck him.

IS IN COMMODIOUS CELL NOW.

Protest of American Consul Proves Advantageous to Pittman.

Managua, Nicaragua, July 18.—William P. Pittman, the American engineer, who was captured by the Madrid forces near Bluefields and brought here, is now confined in a commodious cell. When Pittman arrived under escort a few days ago, he was placed in a dirty cell less than six feet square.

Against this treatment Consul Olvera entered a vigorous protest at the instance of the American government and the prisoner was transferred to better quarters.

Pittman's new cell is shared by two other prisoners, one of whom is a Jamaican negro. Learning of this, the consul requested that the Jamaican be placed in another compartment, and President Madrid issued orders to this effect.

Pittman asked, however, that the Jamaican be allowed to remain, in view of the fact that they had shared other misfortunes together.

Dollars Do Double Duty Now

You're in luck if you need a lot of clothes just now. What looked big to you will look mighty little if you come to us and take advantage of the savings this sale offers.

You can make your selection during this

"QUICK MONEY" SALE

from the regular high-class and well-known garments of every description that sold for a third and a half more before the backward season made us unload.

MADE FLIGHT OF 200 FEET.

Successful Flight of Aeroplane Made by Rutland Young Men.

Rutland, July 18.—Charles and George Schmitt of Royce street, sons of George Schmitt, proprietor of the Cream bakery, made a successful test Sunday of the aeroplane which they have been building for some time. The craft is not of the motor driven type, but is a biplane glider. It was completed Saturday and the test was made Sunday to try out the merits of a cloth used for the planes. Although the cloth was not even varnished and the wind was not favorable, Charles Schmitt, who navigated the airship, was able to make flights of from 75 to 200 feet, well clear of the ground. With especially prepared aeronautic cloth, for which an order has been placed, the Schmitt brothers hope to make much longer distances.

The maiden trip of the aeroplane Sunday was made in the Buffum lot, east of South Main street, and a big crowd witnessed the first flight of an airship in this city.

Counting the weight of the machine and that of the navigator, the planes lifted 200 pounds and the owners consider that this was a very good showing, considering the kind of cloth used. As result of the try-out, several improvements suggested themselves to the young aeronauts and they will be worked out at once.

The biplane made about 30 flights and there were no mishaps.

MONTREAL TO BURY WIRES.

City Council Decides That They Must Be Placed Underground.

Montreal, July 18.—One of the most important measures for beautifying the city, as well as safeguarding it against fire, is the decision of the city council to place all overhead wires, excepting trolley lines, underground.

While awaiting the appointment of the electrical commission, which is to prepare plans and specifications for the underground conduits for the overhead wires, much interest is being taken in the details of the scheme, which will cost millions of money. It is not anticipated that everything will be done in the first season or two, as the charter permits the city to work gradually on the affair.

"Just Say" HORLICK'S

It Means
Original and Genuine
MALTED MILK
The Food-drink for All Ages.

More healthful than Tea or Coffee. Agrees with the weakest digestion. Delicious, invigorating and nutritious. Rich milk, malted grain, powder form.

A quick lunch prepared in a minute. Take no substitute. Ask for HORLICK'S. Others are imitations.

BARCELONA FEELS

GREAT ANXIETY

At the Approach of the First Anniversary of the Great Riots—The Government and the Police Are Busy.

Barcelona, July 18.—Great anxiety over the approach of the anniversary of the Barcelona riots of July 27, 1909, is apparent in government and police circles.

Rioting began as a protest against the prosecution of the campaign against the tribesmen of the Rif coast in Morocco. The calling out of reserves to reinforce the army was followed by a general strike, burning of churches and monastic institutions, and the shedding of much blood before the disturbances were finally quelled.

Clericals and Republicans are holding opposition meetings, and the situation is complicated by the threat of workmen's organizations to call a general strike.

General Weyler, captain general of Catalonia, who was at one time governor general of Cuba, is assembling troops at critical points with the intention of crushing any outbreak.

TEACHERS AT RUTLAND.

Summer School Opened in That City Yesterday.

Rutland, July 18.—The summer school for Vermont teachers opened at 2 o'clock yesterday afternoon at the high school building in this city, with every prospect for a most successful season. At 2:30 o'clock, 45 teachers had been enrolled and a number of late arrivals registered during the afternoon. This is a much better enrollment than had been made last year on the first day of the school. The corps of instructors will be as previously published, with two exceptions. Miss Elizabeth E. Morse, instructor in drawing in the Morris high school, New York, will take the place of Frederick Walter Reid of Framingham, Mass., on instruction in elementary and advanced drawing, and Miss H. Grace Parsons, assistant superintendent of schools of Brockton, Mass., has been added to the original list of speakers. Miss Parsons will give general lectures on "Methods." A representative of the Vermont library commission will also be present on the last day of the session and address the teachers.

The speakers of the afternoon were Dr. John M. Thomas, president of Middlebury college, and Hon. Mason S. Stone, state superintendent of education.

WANT EXTRA COUPONS.

N. Y., N. H. and H. R. R. Issues Order For Collection of More Mileage.

New Haven, July 18.—The following notice was issued from the offices of the New York, New Haven, and Hartford railroad yesterday: "After July 23, the tariffs of the New Haven company will provide for the detachment of two extra coupons from 200 and 1000 mileage ticket books presented for passage to and from New York for the purpose of collecting a terminal charge as was recently done in connection with other forms of tickets."

SUMMER CARE OF COWS.

Should Be Guarded from Flies and Given Plenty of Water.

Many a farmer who gives good care to his cows during the winter, when grass comes, turns them out and allows them to take care of themselves. This is not a bad idea, certainly not while the grass is good and the weather pleasant, but before very long the weather will be hot and the flies will be getting in their work, and the first thing the farmer knows his cows begin to show a falling off in the milk yield, says Farm, Stock and Home. Every summer about the same time we read in the market reports of the advance in the price of dairy products, caused by a shortage on account of the hot weather and the flies. There is not alone a loss at the immediate time, but also a continued loss, because the cow that once falls in her milk cannot be brought back again without heavy expenditure of feed, if at all. Right now is the time to begin preparations for the right kind of care for the cows when the hot weather comes. At that time the grass dries up more or less, so that the cows should have some succulent feed with which to supplement the grass. If the farmer has a silo and has silage left over from the winter, he is all right; but very few are thus provided.

With a good feed of alfalfa, good feed may be given the cows when pastures begin to fail. Of course the alfalfa must be cut and given to the cows, as it can only be pastured at a very great risk. However, it may be cut and fed fresh from the field without any danger of blast to the animals. Plant a field of corn to be cut up green for the cows. A small acreage will give a small amount of first-class feed and prevent the failure of milk, which almost inevitably occurs at the summer season. As a matter of fact, it does not make so much difference what is fed, provided that it is good and succulent, as that cows should be fed something of this nature.

The flies cause nearly as much loss as shortage of feed at this season of the year. They torment the cows so much during the day that they cannot eat as much as they should. There are a great many different kinds of "dope" which manufacturers recommend, with which to spray the cows, which will keep the flies away, but in our experience we have never found anything of this nature very satisfactory. The smell of the stuff is as much of a punishment to a man who has to milk the cows upon which it has been used as the flies are to the cow without it.

The most satisfactory way to relieve the cows of the pest of flies is to allow them to go into the barn during the heat of the day. Have the windows screened with wire cloth, which will keep the flies out, allow the windows to be opened, giving plenty of fresh air and ventilation, and supply the cows with the supplemental food feed prepared for them, and they will be very grateful for the relief from the pest of flies. Then, in the cool of the day, and during the night, they may be out on the pasture with profit to themselves and the owner. Care should be used in the matter of water for summer use, as well as for the winter. Ponds, where cows are allowed to wade and drink are very bad for the milk and butter. A cow given the chance, will wade into a pond to get away from the flies, and will remain there a good part of the day, drinking what water she requires from the same pond. It is no wonder that a great deal of milk and butter produced under these conditions should be rather rank in flavor. If there are ponds in the pasture, be sure and fence them in, so the cows cannot get into them. Give the animals good, pure, fresh water to drink if you want pure milk.
